

# Connect4

By Nathan Hess and Thomas Funhoff IT21aWIN

## The Game

Four in a Row is played on a game board, into which players alternately drop their game pieces. The game board consists of seven columns (vertically) and six rows (horizontally). When a player drops a game piece into a column, it occupies the lowest free space in the column. The winner is the player who is the first to get four or more of their game pieces horizontally, vertically, or diagonally in a line. The game ends in a draw if the game board is completely filled without a player forming a four-in-a-row line.

## Functions

During the game, 4 buttons are visible, which have different functions. They are the following:

1. Save
2. Load
3. Reset
4. Undo

Funktion	Erläuterung
Save	Saves the current state of the game. This saves who's next and the current board.
Load	The saved game state is loaded with Load.
Reset	The Reset button resets the game to its basic settings so that a new game can be started.
Undo	Undo resets the board back to its previous step.
